Speech, Language & Feeding Services

ABOUT US

We specialize in the treatment of developmental, congenital & neurogenic speech, language and feeding delays or disorders.

Our team of certified speech-language pathologists (SLPs) have a diverse range of specialties and languages spoken (Spanish, French, Marathi, ASL) and over 30 years of combined experience treating children, teens and adults.

CHALLENGES

Developmental speech and language delays and disorders

Learning differences and executive functioning issues

Motor planning difficulties that affect speech, oral-motor and feeding abilities

Dysarthria, hypertonia and hypotonia

Fluency/stuttering

Voice disorders second to vocal abuse, neurological impairment, neuromuscular deficits, hydration and hearing loss

Feeding conditions: picky eating, g-tube weaning, structural differences, dysarthria, hypertonia, hypotonia and behavioral challenges

OUR FOCUS

We focus on communication and improving oral language to best prepare children and adolescents for academic readiness and social success. Functional settings, goals and outcomes allow our teens and adults to form interests, relationships, and skills for independence.
